

AutoTraks virtually eliminates repossession delays and lost, stolen or unretrievable vehicles

All you need is an Internet connection and a browser to view and manage your remote assets. Utilizing the largest seamless coverage network in North America, you can locate and view any one of your vehicles on high quality maps that allow you to zoom in to street level locations. We provide:

- History tracking to easily identify where vehicles have been
- Exception reports upon vehicle leaving and reentering Geo-Fence area
- Real-time reports for immediate location and status requests on demand

Low Cost Asset Tracking

AutoTraks' value is in its leading-edge technology that provides an economical cost-effective solution. The OBC AT1100™ is non-descript; it includes the GPS receiver, wireless communications, antennas and mounting hardware for easy out-of-sight installation.

A variety of service plans are available to meet your needs. All plans include unlimited use of On-Board's Internet-based data center for viewing maps and data. Call or e-mail us for a plan to fit your needs.

A history that speaks for itself

The On-Board Communications' team brings over 80 years experience and innovation in product and network development including intelligent wireless mobile communications, emergency dispatch, fleet management and mobile asset-tracking solutions. The team has pioneered development in enhanced cellular networks and GPS for emergency service, roadside assistance, information, route guidance, two-way messaging and theft detection/tracking and has brought wireless solutions to over 80,000 vehicles.

AutoTraks Asset Protection System delivers targeted success

Call or e-mail us for a plan to fit your needs. Take advantage of advanced technology and start recovery today!

AutoTraks™ delivers affordable, state-of-the-art Asset Protection

Your AutoTraks Asset Protection System gives you the power to reduce risk, lower cost and increase the profitability of your finance contracts

AutoTraks™
Asset Protection System

AutoTraks™

Asset Protection System

As an industry professional, you are acutely aware of collection and repossession costs. It can take collections and skip tracing hours to reach the borrower by phone. So knowing the vehicle's location and the borrower's routine during this process is extremely important. And at repossession, knowledge of the vehicle's location history and the ability to pinpoint its exact location is indispensable. By implementing AutoTraks™ Asset Protection System, you gain new cost-effective control, reduce personnel time and costs, and significantly improve your collection and repossession results.

AutoTraks™ by On-Board Communications combines GPS (Global Positioning System), Communications and Internet technologies to give the Finance provider and Dealership a powerful, state-of-the-art means to track, locate and retrieve vehicles — to quickly resolve problem accounts.

Quickly and cost-effectively resolve delinquencies and defaults

AutoTraks is a reliable, proven technology that is economical, cost-justified and easy to implement.

Strengthen Customer Resolve

- Emphasize the payment obligation at purchase
- Dramatically reduce or eliminate first payment defaults
- Immediately contact an owner at delinquency or default

Enhance Personnel Performance

- Eliminate the cost and time of all but basic skip traces
- Empower collections with the ability to inhibit or prevent vehicle usage
- Plan and execute repossessions with precision
- Motivate collection and repossession personnel with greater opportunity for success

Quickly and Economically Target Vehicles

- Instantly locate a vehicle anywhere within the United States, Canada and Mexico — even if hidden
- Repossess a customer's vehicle within hours instead of days or never
- Reactivate lapsed repossession activities and then quickly locate and retrieve vehicles
- Immediately retrieve stolen vehicles

With AutoTraks, there is no such thing as skipped without a trace

On-Board's AutoTraks OBCAT1100
installs out-of-sight within minutes
